

The Blenheim Kennel Range

The Blenheim range of apex kennels and covered runs offer an attractive and flexible solution to your animal housing needs.

These units are manufactured from the same high quality tanalised shiplap cladding as the rest of the Reeves kennel range. The integral galvanised run sections are constructed in 10g 2" mesh or solid vertical bars, which are hot dip galvanised.

Integral kennel box dimensions are 1.2m (4') wide x 0.9m (3') deep x 0.67m (2'3") high. Our standard pophole dimensions are 277mm wide x 451mm high. For larger dogs we recommend full kennel sections to the rear at an extra £50 + vat per unit.

PRICE LIST

The Blenheim Combination Kennel Range

The Blenheim combination provides dry, protected kennelling for your dog and a useful storage / feed area for your bits and bobs!

The Blenheim Combination range are manufactured from the same high quality tanalised shiplap cladding as the rest of the Reeves kennel range.

The store is 1.2m wide x 1.2m deep as standard but can be supplied to the full run depth.

Integral kennel box dimensions are 1.2m wide x 0.9m deep x 0.67m high.

All kennel areas have a damp proof course and the walls are fully lined and insulated, anti chew strips are fitted to popholes and exposed timber edges. Galvanised steel corner strips are fitted as standard to the exterior.
